

Agriculture

Concept map tractor

Purpose

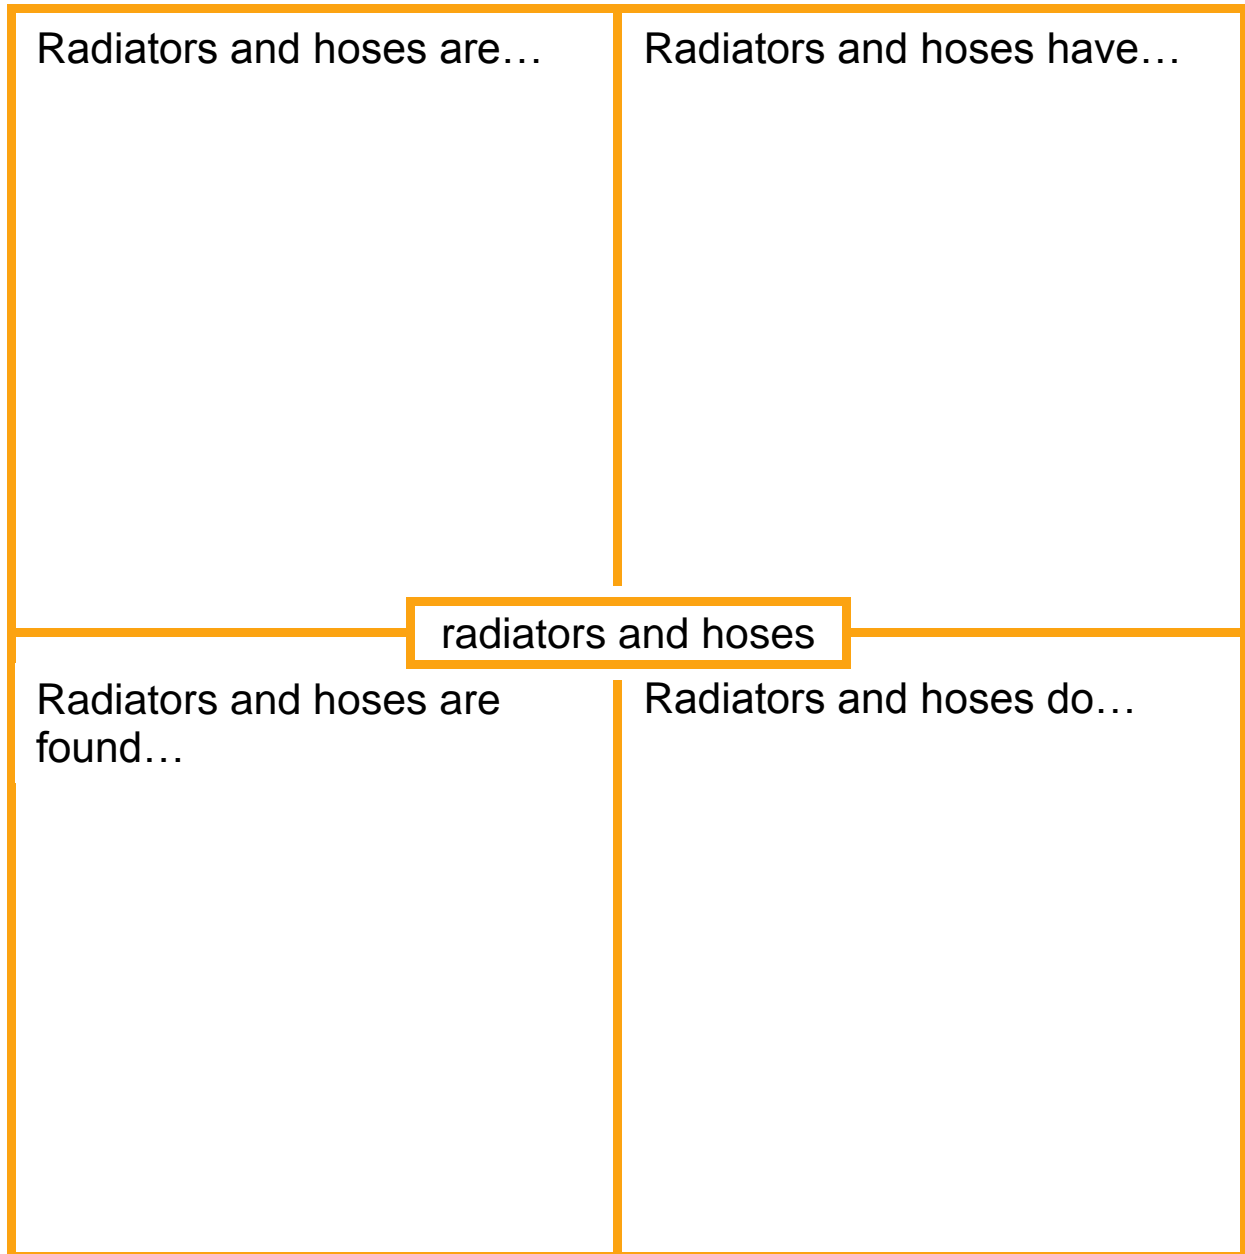

The concept map can be used as a structured brainstorm, to generate learners' ideas about the content of a paragraph or text. Each of the quadrants in the concept map contains a unique prompt. These are:

- 'is' or 'are'
- 'has' or 'have'
- 'does' or 'do'
- 'found'

By asking learners to contribute ideas in response to each prompt you are likely to get richer and more complex ideas from learners than when they are simply presented with the word(s) in question.

Suggestions for use of the concept map tractor on page 2 can be found in [Agriculture: Using headings as question prompts](#). A concept map template is provided on page 3.
